## SURGICAL GOWN

Surgical gowns are available in simple, standard, and key-part reinforced types: reinforced surgical gowns are mainly used in high fluid volume, long-term operations, and reinforced composite materials in key parts such as the chest and sleeves to completely block the surgical Contamination of healthcare workers by blood or other fluids.

### Product model

#### 1. Simple surgical gown

back lace

#### 2. Standard surgical gown

Fully enclosed, no reinforcement

#### 3. Reinforced surgical gown

Fully enveloping, with a reinforced layer on the front chest and the front half of the sleeves.

CUSTOMIZED AS YOUR REQUIREMENT

Unit: cm

SIZE	SUITABLE FOR HEIGHT	SIMPLE TYPE		STANDARD TYPE REINFORCED TYPE	
		A	B	A	B
S (160)	160-165	119	112	136	115
M (165)	165-175	126	117	140	120
L (170)	170-180	137	120	150	125
XL (175)	175-180	150	125	160	130
2XL (180)	180-190	160	130	170	140
3XL (185)	185-195	170	140	180	150

## 1 SMS

SMS non-woven fabric belongs to composite non-woven fabric. It is a composite product of spunbonded and melt blown. It has the advantages of high strength, good filtration performance and no adhesive

## 3 PP+PE

(Polyethylene + polypropylene)

It has chemical resistance, heat resistance, electrical insulation and good high wear-resistant processing performance

## 2 WOOD PULP

Wood pulp cloth has unique absorption capacity and liquid absorption capacity, superior dust-free, soft, anti-static, no damage to the surface performance of objects, toughness and durability

## 4 SF

SF material is a kind of composite material, also known as soft coating, which is characterized by anti-wear and anti-skid

## SMS surgical gown

SMS surgical gown is treated with three antibodies, which has the functions of anti-alcohol, anti-blood and anti-oil, and has strong barrier properties. Ultrasonic stitching of key parts avoids the piercing of the fabric itself by traditional sewing techniques.

SMS non woven fabric, long sleeves, knitted cuffs back neck lace up, easy to wear and take off without reinforced on sleeves and front part, EO sterile.

**Reinforced type**

- SMS non woven fabric
- reinforced on sleeves and front part
- Knitted ribbed cuffs
- Tie at waist with adjustable elastic
- Comfortable and safe, anti-alcohol, anti-static and anti-blood.

**Simple type**

- SMS non woven fabric
- without reinforced on sleeves and front part
- Knitted ribbed cuffs
- Tie at waist with adjustable elastic
- Comfortable and safe, anti-alcohol, anti-static and anti-blood.

## Wood Pulp Spunlace Surgical Gown

Minimization of the danger of infections due to water repellent treatment prevention of lint generation so that may reduce skin allergic trouble various selection for types of surgery such as OS, URO, CS for more intensive protection Decrease of cost and surgery preparation time due to the elimination of reusing process.

The wood pulp fabric is comfortable, soft, breathable, and has the functions of anti-alcohol, anti-blood, anti-oil, etc. with or without reinforced on sleeves and front part.

## Reusable Surgical Gown

It has the functions of waterproof, anti-blood, anti-bacteria, breathable and anti-static. Since it can be reused after disinfection, the preparation time for surgery is reduced, and the single cost is low.

### AAMI LEVEL2

least protective

Most protective

### What does it take to become an AAMI Level 2 surgical gown?

These standards are established by AAMI. Specifically, ANSI/AAMI PB70:2012 is the standard that establishes a classification system (levels 1-4) for protective apparel used in health care facilities, including surgical gowns, based on liquid barrier performance using standardized test methods. The U.S. Food and Drug Administration (FDA) has adopted ANSI/AAMI PB70:2012 as the standard by which all surgical gown manufacturers must abide.

- SMS non woven fabric
- Round neck, short sleeves
- Provides a reliable barrier against blood and other fluids
- important to minimize cross-infection during surgery

**Disposable hand washing gown** are made of breathable, hydrophobic and soft SMS, which is convenient for medical staff to wash their arms, safe and comfortable.

## PROTECTIVE SUIT

Made of high-quality fabrics, comfortable and breathable, highly effective antibacterial, can filter fine particles, dust, etc., effectively isolate various external liquids, filter volatile gases, and avoid direct contact
